

**Scope/**Design, refurbishment & furniture supply

**Sector/**Office

**Site/**Ely Place, London

**Overview/**After the successful fit out and furniture supply to TH March's Devon office, Engage Workplace were asked to submit a proposal to completely refurbish and fit out their office in London. The office was very tired and the ground floor was split level due to the age of this historic building. After extensive consultation with the directors and staff, a design and full specification was agreed. Building and fire regulations were signed off and the works began in November 2016.

### Design - Specification - Lighting - Flooring Partitions – Furniture

The programme was scheduled over two phases to enable the office to remain functional throughout. Engage proposed to carry out the heavy build works over the Christmas period to minimise disruption to staff. Works undertaken included fix and repair of ceiling, new LED lighting, new wiring, raised access flooring and new carpet throughout. Single glazed partitioned meeting rooms were constructed with frosting and branding to finish the contemporary look and feel to the new working environment. The project was in February 2017 as planned.

**Testimonial/**"We were extremely pleased with Engage's approach to our project, engaging with staff and directors to fully understand our needs. The proposed programme of works helped us to continue to function and we are all extremely happy with the end result. Engage did a great job and we would have no hesitation to recommend them in the future."
