

Scope/Design, refurbishment & furniture supply
Sector/Travel
Site/Brittany Centre, Portsmouth

Overview/ Following the successful redesign and fit out of partitioned meeting rooms and furniture for the Plymouth site, Engage were asked to submit a complete refurbishment proposal for the ground floor and 3rd floor of the Brittany Centre in Portsmouth. We were asked to transform the existing 3rd floor office area into a boardroom and client visitor suite and improve the ground floor external staffing facilities to include new kitchens, toilets, changing/locker area and breakout room.

Partitions - Kitchens - Lighting - Decoration
Carpet - Furniture

Process/ After an initial site visit and client brief, our Design team produced a two dimensional product specific space plan. We undertook a full site survey to produce the scope of works involved to achieve the brief. After the space plan was agreed, we developed a complete furniture specification and 3D visuals including an interactive walkthrough to enable our client to see the proposed fit out from every angle

Testimonial/"Engage Workplace were very consultative and proposed ideas and solutions that really helped to improve the facilities offering. The work programme was submitted and approved with all logistics taken care of. Vince and Rupert were very professional and managed every aspect from start to finish. We were very impressed with the end result which mirrored the initial 3D rendered visuals to a tee! "
